Thank you for passing this along. I also reached out to him, but I think I have all of the information that I need, currently.

Thanks again for your help and happy Friday.

Courtland

And this is what I have received on the event:

## **August 6 EPA Statement on Gold King Mine Release**

Yesterday, an EPA team working to investigate and address contamination at the Gold King Mine in San Juan County, Colo. unexpectedly triggered a large release of mine waste water into the upper portions of Cement Creek. Initial estimates are that the release contained approximately 1M gallons of water that was held behind

unconsolidated debris near an abandoned mine portal. There were several workers at the site at the time of the breach, all were unharmed.

Following the release, the Colorado Department of Public Health and the Environment notified water users downstream so they could take appropriate steps to turn off intakes until the contaminated water passes.

The primary environmental concern is the pulse of contaminated water containing sediment and metals flowing as an orange-colored discharge downstream through Cement Creek and into the Animas River. The water associated with the release is obvious and highly discolored. As a precaution, EPA recommends that recreational users of the Animas River avoid contact with or use of the river until the pulse of mine water passes. Over the next several days, EPA teams will be sampling and investigating downstream locations to confirm that the release has passed and poses no additional concerns for aquatic life or water users. EPA will also be assessing damage near the mine portal and any residual releases of water at the mine site.

**Subject:** Animas River Toxic Spill

Hello,

My name is Courtland Jeffrey with KNXV ABC15. I was wondering what information you had regarding the river spill in Colorado? Is it expected to reach us by any means? Where did it originate? How far has the waste travelled? How will it affect our water supply/the Colorado River? Any information you have would be greatly appreciated!

Thank you,

Courtland
